EDUCATION

Johns Hopkins University
M.S. Computer Science

Expected December 2027
Baltimore, MD

WORK EXPERIENCE

Johns Hopkins Bloomberg School of Public Health
AI Engineer

January 2026 – May 2026
Baltimore, MD

- Worked with the Bloomberg School of Public Health on an NIH funded project to develop Discovery Agent 1.0, a Claude-based AI model fine-tuned to the A2CPS dataset, which collects data on whether chronic pain was developed after an injury or surgery.
- Made the A2CPS dataset more accessible by turning natural language into SQL queries and translating the resulting query back into natural language. Utilized Retrieval Augmented Generation to ensure accuracy of query and translation results. Ensured adherence to HIPAA rules to maintain patient privacy.

EY
Technology Consultant

August 2024 – October 2025
New York, NY

- Assisted project manager for the EY AI team and Services Disruption team to optimize the training of an AI model that automates current state assessment of EY clients' cybersecurity infrastructure.
- Organized team's Azure DevOps board to ensure consistent language in user stories and maintained the team's backlog to promote smooth Agile workflow.

Amazon
Software Engineer Intern

May 2022 – August 2022
Seattle, WA

- Reduced latency of purchasing Audible books through Alexa by roughly 100ms by refactoring Kotlin API calls to remove redundancies. Code deployed to production at the end of the internship.
- Standardized the team's documentation process and organized the team's internal Wiki page, making it possible to navigate to any document within 3 clicks from the team's home page.

PROJECTS

HopShare

- Developed a web app for JHU students to coordinate rideshares to/from similar locations and split costs. Implemented Google OAuth login, utilized the Google Maps API, built with React and MongoDB, and deployed on Vercel.

Dental Clinic Volunteer Management System

- Worked with a local dental clinic to develop an admin portal to manage volunteer shifts and keep track of information and statistics. Tech stack includes React, NextJS, Tailwind CSS, Supabase and Vercel.

Clearcost Flights

- Developed a site that displays live pricing data from Google Flights in combination with other data such as airline mileage earned to better represent true cost of a flight. Utilized SerpAPI and deployed with Vercel.

CERTIFICATIONS AND SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python, SQL, HTML, CSS
- **Frameworks, Libraries, Tools:** React, Node.js, JUnit, TensorFlow, PyTorch, Numpy, Pandas, AWS
- **Certifications:** HSK 5
